

Flowchart . a strategy for organizing the order, heirarchy and interrelationship of portfolio & web pages.

FLOWCHART

- a flowchart is a method for organizing the “flow” of portfolio or web pages.
- the levels of the flowchart create the heirarchy necessary for primary, secondary and teritary navigation.
- each level may connect within the topic and to related items, resources or documents.
- primary levels should be available on a “projects” page in a printed portfolio and on all web pages, to ensure ease of navigation.
